CHRISTIAENS AGRO SYSTEMS IS MOVING

On January 1st 2022, Christiaens Agro Systems took over the company LVS in Sevenum.

At LVS, machines are developed and produced for cleaning, filling, dosing, closing, labeling and packaging of pots. The jars and lids can be made of different materials. Total solutions are also offered for this in the form of complete lines including the necessary logistics.

At first, it may seem that the 2 companies not have a lot in common. But both family businesses have similar core values. This way, reliable, durable machines are produced with a very long lifespan. The aim is to find solutions in innovative techniques that can further improve efficiency for customers. Both LVS and Christiaens Agro Systems have a good reputation in the market and will continue separately in their own/existing markets.

In order to make better use of the internal synergies, it has been decided that Christiaens will move from Neer to Sevenum. In this way we can help and strengthen each other faster. And this allows us to serve our customers even better.

The current building in Neer will only store machines. All construction work/development/parts/sales will be moved. This will happen as soon as possible, but no later than January 1st of the new year. Parallel to this, work is being done for the slightly longer term on a completely new location that is even more suitable.

From 1 January you are welcome at:
Lenssen Vul- en Sluittechniek & Christiaens Agro Systems
Berghemweg 23
5975 RJ Sevenum
